

Gaillard Plat Collection, 1835-1989 (bulk 1900-1980)
SCHS #575.00

Description: 19 Linear Feet

Biog./Historical Note: John Palmer Gaillard (1874-1962) is listed as a surveyor as early as 1910 in the Charleston city directory. In 1923, he is listed as a civil engineer. In 1939, he partnered with his son William Lucas Gaillard (1912-2001) in the firm of Gaillard & Gaillard. In 1940, Gaillard & Gaillard is listed in the city directory as “engineers, surveyors, timber estimators and blue printers.” In the late 1960s, William Lucas Gaillard, Jr. (1944-2001) joined the firm as a “surveying trainee,” and by 1971 he and his father are listed as the partners in Gaillard & Gaillard.

Scope and content: This collection chiefly consists of plats created or collected by the surveying and civil engineering firm of Gaillard & Gaillard, some relating to timber lands and rights. Drawings, some copied or compiled from earlier sources, depict plantations, subdivisions and other properties in the South Carolina counties of Berkeley, Charleston, Dorchester, Georgetown, Colleton, Orangeburg and elsewhere. Subdivisions in the Charleston area which are represented include Park Circle (North Charleston), Parkdale, Maryville, and Moreland. The collection also includes a small number of 19th century plats; geographical surveys created by the U.S. Army Corps of Engineers; sketches depicting the location of Huguenot monuments in Berkeley, Jasper and McCormick counties; and a few aerial photographs.

Note: The bulk of the collection is oversize material located in flat file drawers (C - space). The remainder, which consist of non-oversize documents, is located in boxes in vault A.
